

Dear Colleagues

It is a pleasure to invite you to the Workshop **“Towards Solar Energy Storage”**, which will be held in the Chemistry Department, Coimbra on **Friday 2nd February 2018**. The location will depend upon the number of participants.

The Workshop is held as part of the Project **SunStorage**, involving the Universities of Porto, Coimbra, and New University of Lisbon. It is designed to be very informal and there is no formal registration or fee. However, I would be grateful if you could register at

goo.gl/MeJGD7

so that we can make the necessary logistical arrangements. Feel free to pass the information on this Workshop to anyone you think may be interested.

The meeting will consist of a series of 15-20 minute oral presentations, followed by discussion. There will also be presentations from Matthew L. Davies (SPECIFIC, Swansea University, UK), Ana Charas (IST, Universidade de Lisboa), Henrique L. Gomes (Universidade do Algarve), and Christopher M. A. Brett (Universidade de Coimbra).

In keeping with the informality of the meeting, there will be no book of abstracts. However, we will send the Programme by email before the Workshop, and will be happy to give Certificates of attendance, if requested.

Looking forward to seeing you in Coimbra,
With kind regards

Hugh Burrows
